Consult • Design • Engineer • Fabricate

Winsted Technical Interiors is a premier provider of custom technical furniture. With more than 25 years of Design, Engineering, Fabrication, and Installation experience, Winsted Technical Interiors offers turnkey solutions for any project. We specialize in creating work environments that bring form and function together to meet your exact requirements. The following pages contain sample solutions we have developed.

Custom Project Design

Custom solutions are made simple with experience and knowledge. Winsted Technical Interiors will generate your complete custom design proposal, help you realize your most creative concepts, and work directly with your architect/consultant to move your solution from concept to installation in no time.

Seamless Integration

Winsted Technical Interiors specializes in the man-machine interface – integrating technology and users to create ergonomic, productive workspaces. We offer project design services tailored to each application, taking into consideration, the equipment list, room, function, and customer aesthetics.

Material Selection

Winsted Technical Interiors offers a broad range of materials for your project. Powder-coated steel, DuPont Corian®, custom laminates, and wood veneers enable us to match your existing color scheme or create an entirely new look.

In-house Design Team

Simple to Complex - our experienced staff of Industrial Designers, Engineers, and Drafting Technicians will take your design from concept to reality.

FREEFORM Consoles

Our Freeform consoles achieve a perfect balance between form and function. While ideally suited for Command and Control operations, Freeform consoles fit any application requiring a spacious, upscale appearance.

MATRIX SLAT TRACK Consoles

Matrix Slat Track consoles are perfectly suited for applications requiring multiple, adjustable monitors. Articulating monitor mounts swing into position for touch screens and LCDs.

MATRIX LOW PROFILE Consoles

Matrix Low Profile consoles target applications with limited console space requiring multiple monitors. Primary console monitors are located below the work surface height to improve efficiency and reduce operator fatigue. LCD mounting poles accommodate vertical expansion.

TALON Consoles

Talon consoles are designed as a “stand alone” solution. Individual Talon fingers support a variety of monitor sizes – allowing configuration for a variety of applications. Talon’s flexibility allows it be configured to your most demanding requirements.

ARIZE Consoles

Arize console designs achieve perfect balance in various applications. Mechanical drive arms smoothly retract LCDs for a spacious workspace.

Single-button operation converts your worksurface into a monitor station.

Reception Consoles

We design and create custom reception console solutions that combine operator efficiency, function, and technology integration, while projecting that all-important first impression. Design and materials vary widely to meet the exact requirements for your environment.

Custom Millwork

When off-the-shelf won't do – Winsted Technical Interiors has the ability to create custom one-of-a-kind solutions to fit your needs. In-house design and fabrication let us deliver ergonomically correct, totally integrated solutions.

Total Solutions

We create Total Solutions –
from small single-operator consoles,
to custom conference room tables,
to full room operations.

Winsted Technical Interiors provides:

- Raised Floors
- Seating
- Control Stations
- Lecterns
- Conference Room Tables
- Movable Projection Centers
- Image Wall Enclosures
- Acoustical Wall Treatments

Consult • Design • Engineer • Fabricate

When you consider updating your control room, let our experts help you. For over 25 years, Winsted Technical Interiors has been designing, engineering, fabricating, constructing and installing control rooms for the power generation industry.

No other company better understands the unique requirements, design criteria and implementation restrictions. Our staff has both the experience and the disciplines to meet your requirements.
